

LALIQUE

Your ring size

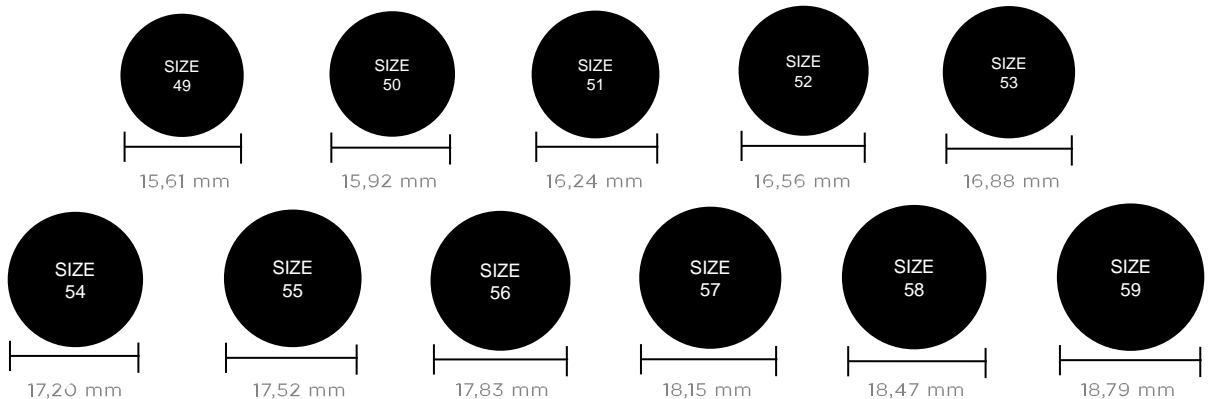

Before printing the following document, make sure the « scale to fit » box is unchecked in the print dialogue box. Use a ruler to verify that the scale corresponds to the unit below:

Choose a ring (preferably an engagement or wedding ring) that corresponds perfectly to the finger on which you would like to wear your new Lalique ring.

Position your ring over the circles shown below, by lining up the inside of the ring with the circle that fits best. Your ring must be placed on the outside of the black circle. If the ring is between two sizes, choose the bigger one.

Lalique rings sizes vary from size 49 to size 59 depending on the model and on the collection.
